

**Department:** Proctology

**Doctor Name:** Dr. Samhitha Reddy

**Doctor Timings:** 10:30 AM to 6:00 PM

**Diagnosis:**

- **Piles:** Hemorrhoids, also known as piles, are swollen veins in the lowest part of the anus and rectum. They can cause significant discomfort, swelling, and bleeding during bowel movements, with symptoms including pain, itching, and noticeable lumps around the anus.

**Approx Cost:** 65K onwards

- **Fissures:** Anal fissures are small tears in the mucosa that lines the anus, which can cause severe pain, particularly during and following bowel movements, and bleeding.

**Approx Cost:** 60K

- **Fistula:** An anal fistula is a small tunnel that forms between the end of the bowel and the skin around the anus causing pain, discharge, and discomfort, often resulting from an infection or an abscess.

**Approx Cost:** 70K

- **Abscess:** An abscess is an infected fluid and pus-filled pocket that forms in tissue as a reaction to infection. It can cause significant pain, swelling, and redness, and may require surgical intervention to drain and treat effectively.

**Approx Cost:** 15K under anesthesia, 60K

#####

**Department:** General Surgeon

**Doctor Name:** Dr. Abhishek Katha

**Doctor Timings:** 1:00 PM to 5:00 PM

**Diagnosis:**

- **Breast lumps / abscess:** These are often painful, pus-filled lumps within the breast tissue, typically caused by bacterial infections, frequently occurring in breastfeeding women.

**Approx Cost:** 50K

- **Sebaceous cyst:** Commonly developing on the face, neck, or torso, these are noncancerous cysts beneath the skin, filled with a protein called keratin and are usually harmless but can become inflamed or painful.

**Approx Cost:** 10K to 15K

- **Corn Excision:** Corns are hard, thickened areas of skin that form as a consequence of rubbing, friction, or pressure on the skin, often on the feet and toes or between toes, requiring surgical removal if they become painful.

**Approx Cost:** 8K

- **Nail Excision:** This surgical procedure is performed to remove part or all of a nail, typically due to fungal infections, ingrown nails, or nail trauma.

**Approx Cost:** 8K

- **Appendicitis:** This acute condition involves inflammation of the appendix, characterized by pain in the lower right abdomen, which can become severe and

requires immediate surgical removal.

**Approx Cost:** 70K

- **Thyroid:** Thyroid issues involve the gland in the neck that produces hormones essential for metabolism, growth, and body temperature regulation. Problems can lead to significant health disorders requiring careful management.

**Approx Cost:** 90K

#####

**Department:** Urology

**Doctor Name:** Dr. Santhosh Kumar

**Doctor Timings:** 3:00 PM to 6:00 PM

**Diagnosis:**

- **Circumcision with Laser:** A modern technique using a laser to remove the foreskin, reducing pain and recovery time compared to traditional methods.  
**Approx Cost:** 25K
- **Laprotomy:** This major surgical intervention involves opening the abdomen to allow access to the abdominal organs for diagnosis, treatment, and surgery.  
**Approx Cost:** 90K
- **Kidney Stones:** Hard mineral and salt deposits that form inside the kidneys, often extremely painful to pass and may require medical intervention to remove or break down.  
**Approx Cost:** 90K
- **Circumcision with Stapler:** A newer method that uses a surgical stapler to perform circumcisions, enhancing recovery and decreasing procedural time.  
**Approx Cost:** 40K
- **Vasectomy:** A permanent contraceptive method for men where the vas deferens are cut or sealed to prevent sperm from entering the seminal stream.  
**Approx Cost:** 50K
- **Varicocele:** An enlargement of the veins within the scrotum that can cause pain and lead to fertility issues, treated surgically or non-surgically depending on severity.  
**Approx Cost:** 70K
- **Cystoscopy:** A diagnostic procedure using a cystoscope to visually inspect the interior of the bladder and urethra for abnormalities.  
**Approx Cost:** 30K

#####

**Department:** Gynecology

**Doctor Name:** Dr. Samhitha Alukur

**Diagnosis:**

- **MTP:** Medical termination of pregnancy involves using medication to terminate a pregnancy safely and legally, with specific protocols depending on the gestation age.  
**Approx Cost:** up to 6 weeks 25K, up to 12 weeks 40K, up to 20 weeks 60K

- **Myomectomy:** Surgical removal of fibroids from the uterus, a procedure opted to avoid a full hysterectomy and preserve fertility.  
**Approx Cost:** 90K
- **Ovarian cystectomy:** Removal of cysts from one or both ovaries, often performed laparoscopically to minimize recovery time and surgical risks.  
**Approx Cost:** 90K
- **Hysterectomy:** Surgical removal of the uterus, performed for various medical reasons including cancer, chronic pain, or heavy bleeding.  
**Approx Cost:** 90K
- **Tubectomy:** Also known as tubal ligation, this surgical procedure involves severing and tying the fallopian tubes to permanently prevent pregnancy.  
**Approx Cost:** 60K

#####

**Department:** Plastic & Cosmetic Surgery

**Doctor Name:** Dr. Chandana Gudur

**Doctor Timings:** 11:00 AM to 2:00 PM

**Diagnosis:**

- **Gynecomastia / Man boobs problem:** Treatment for enlarged male breast tissue, often due to hormonal imbalances, obesity, or medication side effects, possibly requiring surgery for correction.
